The Superintendents of several counties, reserved sid from the public fund, in the work of carrying on County Institutes. The law is now made general, and allows from sixty to two hundred counties and the necessary expenditures for locatives, books, stationery, &c. This is considered a grand feature in the Supplemental could institute a reportable, and to have good histitutes requires expense, thus and hard work. Now the County Superintendents are supported financially by the State, and if they fall in organizing good institutes, it will be their own want of capacity. The standing of teachers will be reflected by these legal Institutes; teachers extended to the fastioners will be marked neverting to, their attendance at the Justitutes.

If Superintendents are thorough in their examinations, many of the "old?" trachers must drop off, for the list of studies is quite long, and many teachers of to-day, never looked into a book on teaching, and bardly know the barest facts of history. The act has a noble intention, and it is hoped that it may be exceuted by competent hands. VI-ELECTION OF SUPERINTENDENTS.

An effort is made to raise, the standard of the superintendency; it being well-known that incompeniency is to common among Superintendents. The law demands that the candidate shall be a successful teacher, a liberal scholar and enable in general respects.

THE FIRST DAILY PAPER IN THE OIL REGIONS.

Sinking and Disappearing of a Dwelling with its Contents.

From the Miner's Journal
On Friday afternoon, the 10th inst, a singular and startling accident happened near Girardville, at the foot of Mahanoy Plane, about six miles from Mahanoy City, this county. It seems that at that point a "britast" of the Boston & Mahanoy City, this county. It seems that at that point a "britast" of the Boston & Mahanoy Coul Company's colliery had been worked to within about twenty feet of the surface of the earth, and that located just above it stood at twastery frame building, occupied by Mr. Thomas T. Myers, a breaker bose at the colliery, and his family. He also had a number of boarders, whose clothing, etc., were in the house.

About three o'clock on Friday afternoon, as Mrs. Morris Robinson, of this Borough, wife of the Superintendent of the colliery, who was on a visit to the house, and Mrs. Myers, were in the kitchen, they felt the house moving and rushed in lands I not the open air. Two minutes had hardly clapsed after they left the house, before it sank with a surging; swaying motion into a huge chasm, to the depth of about eightly feet. Large masses of earth and rock from the stiles of the chasm, immediately closed in upon the house, burying at almost completely from view. The complete entombment of the dwelling, which was about thirty leet long, may be imagined, when we state that the class formed by the cinking of the mine would readly have admitted Pennsylvania II-1, a building over one hundred feet in length.

Pennsylvania II.al, a bullding over one nonured feet in length.

The house contained seven beds and bedding, lour staves, bureaus and other furniture, heeides a considerable quantity of clothing, a Sunday school library and some money. There was fire in several of the stoves and shortly after the currence smoke was seen issuing from the earth which covered the roof, rendering it almost certain that the house had been set on fre. Streams of water were directed into the chasm, and it was hoped that the house would not be entirely destroyed.

was noped that the holes would not be entirely destroyed.

The value of Mr. Myers' properly in the house was about \$2,000, of which \$200 was in money; a gold watch valued at \$100, and furniture and clothing enough to make up the balance. A boarder, who was a carpenter at the mine, had \$50 in money and clothing in the house. Mr. W. Robinson, son of Mr. M. Robinson, who was also a boarder, had clothing, a revolver, etc., in the house, valued at \$100. Several other boarders also sustained losses in clothing and other articles.

The good people of Maine have been trying the virtues said to he in a strict enforcement of this well-known statute. The constabulary having concluded their legitimate labors, have resently been employed as follows, if we may believe the Standard, published at Augusta. It sees.

A conhectioner was tried for selling "Gin-ger snaps."

A horse run away and smashed a wagon. The horse was promptly arrested, but it being proved the "smash" contained nothing intoxicating, he was acquitted.

Several "cocktails" found in the hencoop of a prominent clitzen, were confiscated. The success of the pelice in this schure caused much "crowing," and it will doubtless "spur" them on to increased activity.

An unfortunate liberaian was locked up for getting a "punch" in the head.

A worthly shoemasker, selzed on suspicion of heling a "colbiler," but proving there was no condition this should be his "last" offense. He was informed that any future dereiletion would involve the confiscation of his "all." The excitement "waxed" intense.

Compilant that a barrel of beef was found "corned" at Adams. Is highly recommended for Olearing the Voice and Rolleying

Mark Twain's Last.

And then, there were the peddlers. I bought out the pop corn boy to get rid of him, because I was trying to compose a grown feet your body and bound to be disturbed. But be extra right back with a stock of pennine. I took a few, and hurried him away, and he returned with some lecenism candy. I don't like iccorream caudy and peanuts together, but I invested at once, because an inspired rhyme had been borne to me, and I wanted to set down before it slipped by me. Then the secondrel came back with a ronges, minitation lever lealy whistics, fignate and applies; and then be went away and was gone some time, and I was encuraged in hope the train had run over him. Such was not the case. He was only keeping his most hadien and outage for the last. He was getting his literature ready.

And from that time forward that degraded yould did nothing but march from one car to another, and affliet the passengers with specimen copies of the vilest blood and thunder romances on earth. "Lone! Warburton, or the Ferjiner's Doom;" "Golfrey de Langley, or the Desperado's Revenge"—those were some of the midest works, and on their backs were peters of subding

When passing along in cara between Allegheny City and Freeport a few days ago, I saw a large oil tank—auch as you have many of in your town—that had recently been struck by lightning and all its contents consumed togother with much valuable property configuous thereto.—Many thousands of dollars were lost by this it seems the lightning struck a pipe in top of tank, and in a moment all was in a litize. The large tank burst and the intring oil flowed out in rivers of flame consuming all before them. Oil men should not have they projecting pipes on top of tanks; they act as sitractions to the lightning. Between lightning and low prices the oil dealers have trouble enough; but their time will come too, and the markets will probably rise again to the other extreme. The long expected opinion of Attorney Gen cal Stanberry upon the Reconstruction Act has seen published. It is not complete. Several of the most important points of the act are reserved for further consideration. 1. Those who participated in the rebellion and who before the war held office and had swore allegiance to the United States. In this class be-enumerates all members of Congress; all mem-bers of the State Legislatures, the Governors Lieutenant Governors, Anditors, Treasurers and Lieutenant Governors, Anditors, Treasurers and Secretaries of State; and all persons who, as executive or judicial officers of the State, had taken the oath to support the Constitution of the United States. All deserters from the army and navy of the United States no also disfranchised from voting and cumot invisily take the oath. 2. All persons who, during the rebellion, act ed in any official cap telly where the duties of the office necessarily had relation to the rebelliousuch as members of the rebel Congress and rebellious, diplomatic agents of the Consenter acy, and those other officers whose duties appear acy, and those other officers whose duties apper-tained more especially to the support of the tokel cause, are distranchised. Officers in the rebel States who performed duties not incident to the war, but in the preservation of order and exe-cution of the law, are not distranchised.

Participation in the rebellion, contemplated by the act of Congress, is voluntary, and sor timents, must have taken place to disqualify th person. Voluntary contributions in furtherance of the rebellion, subscriptions to the rebel load and organized contributions of food and clothin be classed as disqualifying acts.

The eath prescribed by the act is the only oath that can be administered. If the person take it his name must go on the registry; the Board of Registers cannot inquire as to the truth or faisity of the oath. At elections the duty of the Board is to receive the votes of all persons registered

This opinion of the Attorney General will ac mit to registration, and, consequently, voting, a very large number of pursons who were gener ally supposed to have been disqualified by th Reconstruction Acts, but he has evidently con struck those acts fairly, according to the rules o legal interpretation, and if the disqualifying auses are not broad enough, it is not his lault but the fault of the acts themselves.

At Hannahatown the woman's husband, a solver, decent looking farmer, met her, and all pitted him, as he carried his drunken wite and poor, hungry, neglected his drunken wite and poor, hungry, neglected child and laid them down in his wagen and drove off. It takes whisky, Mr. Editor, to degrade and pollute poor, trail, fallen humaniy, and I only wish that all the apologists and defenders of drink and the dinking usages, had to rides occasionally ten miles in a stage with a drunken woman and crying child. It would do them good; like medicine.

A man has been, convicted of murder in the first degree at Butter, for killing two men with a butcher taife at a dance in one of the villages of that county on last Christmas eve. The party, male and female, met to have a gay and festive time, and all went well enough until whisky began to operate and start them to fight, then

That one case has cost the county upwards of seven thousand dollars, and it has opened the eyes of many to the fact that after all the profits of the fleense system don't begin to cover the exact, and now all Butler town and county are soing strong for Prohibition. Mowbray vs. Pierce. To Ira H. Pierce, City Attorney Titusville: I repeat the charge against you, of permitting three warrants to be Issued against Leonard Dodd, nominally for assault, but really to infini-date the complainant into withdrawing his charge against one of the complaining officers. I de

I stigmatize the practice of Issuing warrant on counter charges as vexatious and pettifogging, and I assert that' it is calculated to bring your profession into disrepute, and that it has been the subject of indignant comment with our fellow-citizens. Such are the points of our contro versy. How eleverly you eyade the question quest, in an evil hour, are beguiled to append not daring to bully his opponent, threatened to ply to the legal error you fell into; your treat ment of the subject is merely a renelition of the nettifogging practice that raised this controversy. and which I denounced, as an abase of the name and seem so inequable of reniving to the notet. that I surrender to you the palm of calling name and starting Iresh Issues, but utterly refuse to buy your support by altering the spelling of intendo as used by Bishop Warburton, the first scholar of his age, in A. D. 1884; as he spelled h I am content to spell it, mil will not be guilty of the barburism in 1867 of using two "nis", when in 1874 one sufficed, more especially since we are now giving up one "g" in majon, and leaving out the u's in governor and neighbor. Continue your preference for Simon Strouse, Sep, but do not drag him into this controversy. You might, however, hwe put the "q" in lorgiviness, and likewise after the "ac." Uhanging the dissiplination are extra "g," and writing an "ni" without an extra "g," and writing "agricymice," make it neither list, thesh nor good tell herring; whilst the extra "a" that disfigures decissions" is sheer waste of metrial.
